**Take Control of
Your Data
Archiving Strategy**

Data Protection Service Includes:

- **Offsite Storage for All Media Types**
Suitable for LTO, HDD, SSD, RDX, CD, DVD, NAS, DAT, and DLT.
- **Secure Climate-Controlled Vault**
Temperature and humidity are continuously monitored and maintained for optimal media preservation.
- **Scheduled Doorstep Delivery**
Media are transported securely and promptly.
- **Urgent Recall & Disaster Recovery Support**
In the event of a data incident, our team provides rapid media delivery to your designated data recovery centre.
- **Secured Transportation Service to Multiple Locations**
Deliver to headquarters, satellite offices, or disaster recovery sites across Singapore.
- **Choice of Loose Item or Media Case Storage**
Select how your assets are grouped, logged, and stored depending on your usage and audit needs.
- **LTO Tape Health Check**
Prevent data loss with tape health check service.
- **Secure Media Destruction**
When tapes reach end-of-life, we handle certified destruction and provide a Certificate of Destruction for your records.

SECOM's offsite tape storage solution helps organisations maintain business continuity by *safeguarding backup media in a purpose-built, high-security environment.*

Regulatory Peace of Mind: We are certified in **ISO 9001**, **ISO 45001**, and **ISO 22301**, ensuring that our operations meet international standards for quality, safety, and business continuity.
